ABOUT

Born in the age of Cloud and disruptive IT transformational times, AvidAll Technologies Pvt. Ltd. (AvidAll) is a dependable knowledge partner helping organizations around the globe achieve their dream of RPA, Big data, AI, IOT and modern IT transformation at a faster pace, tapping into the vast Indian IT knowledge pool.

We are known for brining advantages of disruptive innovation, focus on emerging technology, agility, scalability, cost efficiencies & skilled resources to the table while working across multiple industry partners.

VISION

Emerge as a RECOGNIZED LEADER in all our areas of operations.

MISSION

Build highly performing and results oriented technology services teams and products.

VALUES

Passion | Teamwork | Continuous Learning | Continuous Improvement

INDUSTRY SPECIFIC EXPERTICE

Automotive

Automotive manufacturers and service providers are rapidly evolving ways to partner with their customers to improve driving experience.

They are focused on data science, design thinking and eco-friendly ways to improve their engineering solutions cost-effectively.
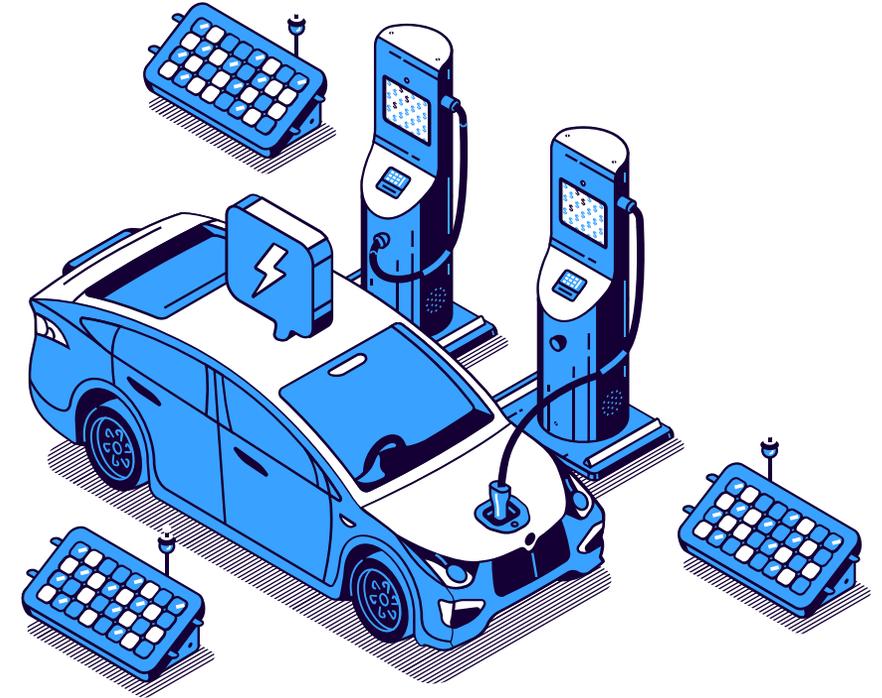

INDUSTRY SPECIFIC EXPERTICE

Banking, Financial Services and Insurance

Today, the banking and financial services industry is focused on digital customer experience through technologies like AI, ML, blockchain, cyber security, IoT, Big Data and cloud.

AvidAll aims for a smart enterprise-wide approach that boosts their digital presence, increases cross-selling opportunities, improves customer experience, and helps them comply with data privacy regulations.

INDUSTRY SPECIFIC EXPERTICE

Public Sector

Public sector organizations around the world are facing multiple challenges like financial crisis, technology changes and real-time 24×7 support to meeting high customer expectations.

Whether looking to improve operational efficiency or drive more value from existing infrastructure or manage challenges associated with delivering better services for stringent budgets.

INDUSTRY SPECIFIC EXPERTICE

Health Care

As medical technology is making commendable advances, we also see the rise of technology to manage healthcare at the backend. We see healthcare technology trends in the industry that are not only meant to make the lives of the patients easier, but also solve some massive problems

We create a user-friendly interface, integrated built-in reference tools for all standards and safeguards, we also understand the complexities and challenges of incorporating patient information from multiple sources while providing functionalities to conduct data analysis.

INDUSTRY SPECIFIC EXPERTICE

Travel & Hospitality

In this digital age Travel & Hospitality industry is accelerating at fast pace. But this isn't the only thing changing. Consumer behaviour is also evolving, becoming more complex and difficult to interpret.

Their demands are now higher than ever, and they seem to appreciate customer service and experience above other variables.

In this challenging scenario AI and Machine Learning will come to your rescue, (virtual customer assistant) Chatbots are one of the biggest technological advancements today.
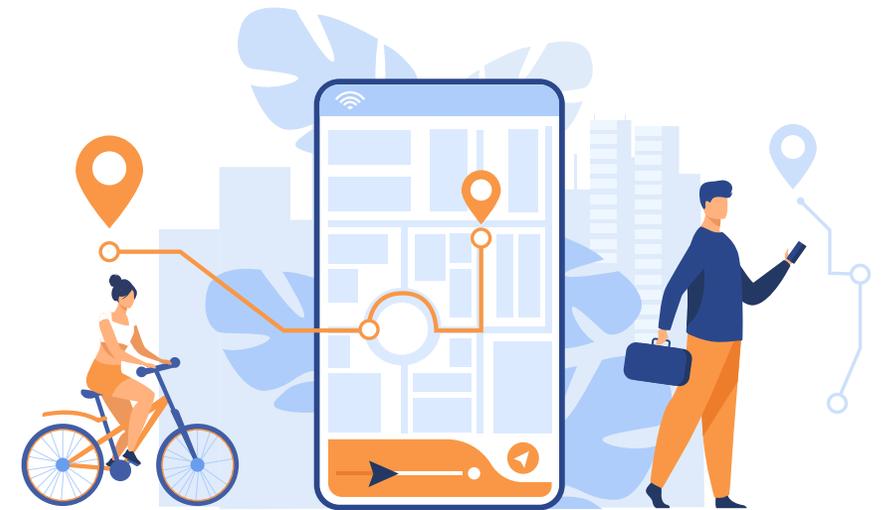

OUR TECHNOLOGY FOOTPRINT

Robotic Process Automation

We work towards your challenges to be simplified & automated to make life easy. Do your employees spend too much time sending confirmation email messages for online forms and not enough time speaking with clients? This increases manpower costs without an increase in your sales volume.

You could complete similar simple repetitive tasks with software like process automation for businesses, such as checking an online form for missing information for an appointment before sending a confirmation email message for the scheduled meeting.
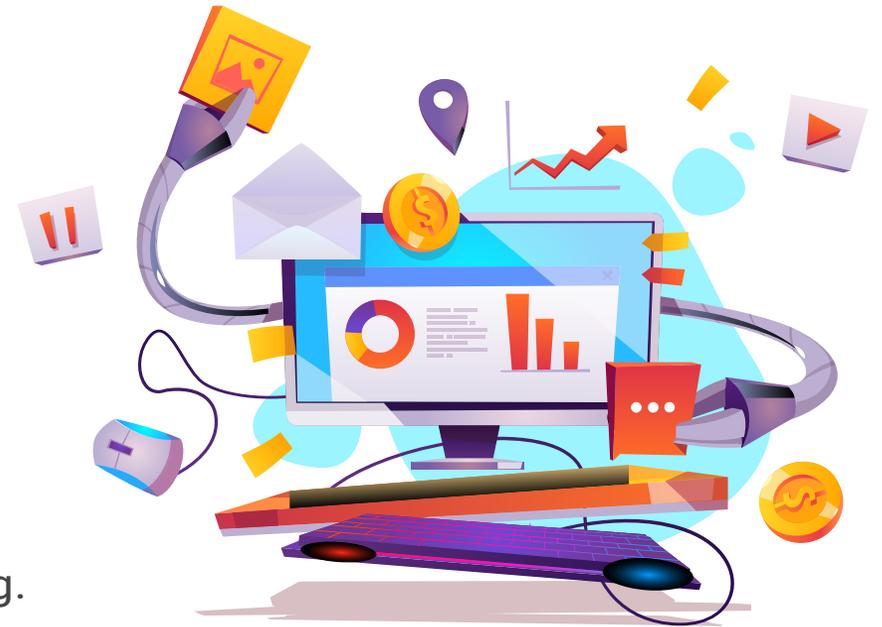

OUR TECHNOLOGY FOOTPRINT

Data Management

Data Management will Empower employees to collaborate and easily experiment using the available data and algorithms to create value for the organization through several possible ways: creating new insights, fostering data-driven decision-making, testing new business models or optimizing existing processes.

Expand your business and rest leave it to us we protect your data & simultaneously help you save money while doing it.

OUR TECHNOLOGY FOOTPRINT

Artificial Intellegence

We foresee your challenges & implement Artificial Intelligence in Sales/Marketing, Track Competitors, Make light work of Big Data, AI integrated customer support solutions and Artificial Intelligence in CRMs to name few areas. We trust & confident that above mentioned niche areas will help & cater to your vast business challenges & opportunities you may be facing / having.

AI (Artificial Intelligence) is no more confined to innovation labs only. It is being praised for its amazing potential to transform businesses across platforms & industries.
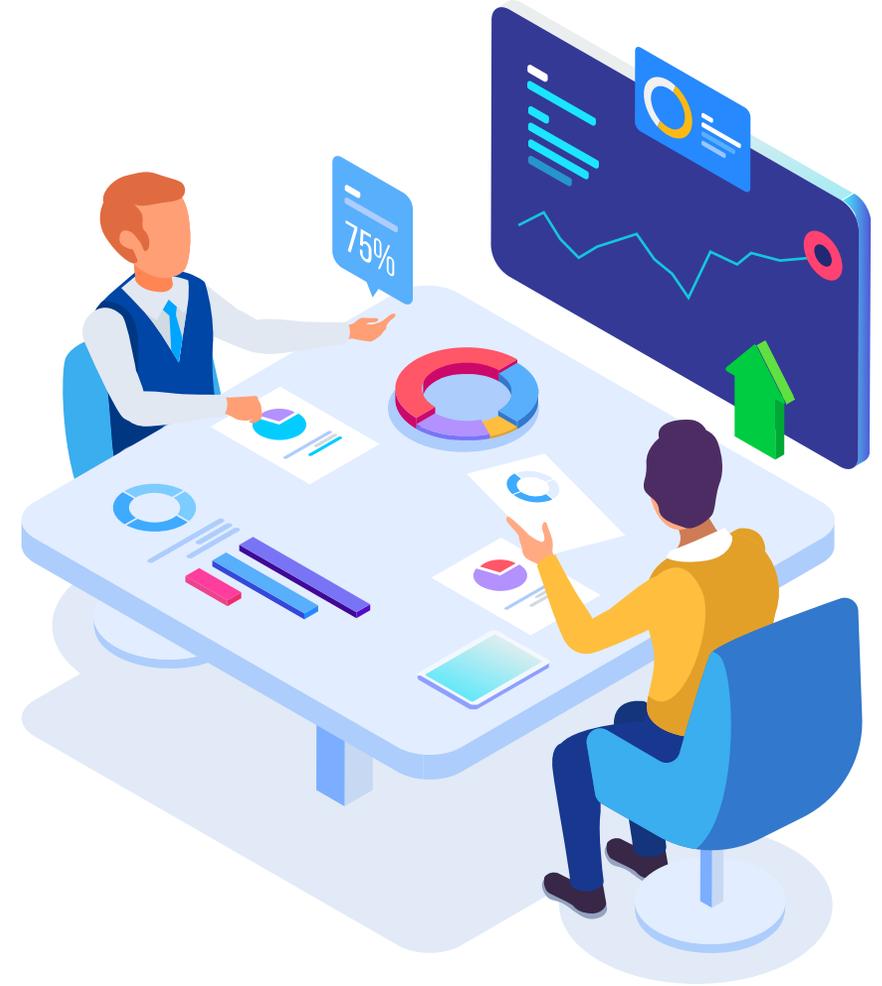

OUR TECHNOLOGY FOOTPRINT

User Experience

We at AvidAll inspired by creating game-changing products that invoke a sense of excitement, closeness and satisfaction for the user.

As your User Experience and Technology Partner, we build customized software solutions, be it websites, web applications or mobile applications, that are fluid and flawless

OUR PROMISE

AvidAll provides comprehensive software consulting services promise, fulfilling all your organizations challenges and needs. We foresee your requirement in six-stage process as our customer challenges, target market, project budget, relevance, urgency, and clarity.

We believe and experienced the process will help us to reach your core challenge and find the root cause and provide solution accordingly
